# DIRECTORY OF HOUSEHOLDERS

Copyright, 1934, by THE WILLIAMS DIRECTORY CO.

The following is an alphabetical list of the names of the Streets and Avenues of the city, with a description of where each Street or Avenue is located. Main Street and Walnut Street are respectively the dividing line of all streets crossing them. Walnut Street runs north and south, and all streets crossing it are distinguished by prefixing either East or West to their names. Main Street runs east and west and all streets crossing it are distinguished by prefixing either North or South to their names.

The number of each building on the street is given in numerical order, and opposite the number is placed the name of the householder. In business blocks containing offices, the occupant of each room is shown by number where practicable.

Even numbers appear on the north side of streets running east and west and on the east side of streets running north and south. Odd numbers appear on the south side of streets running east and west and on the west side of streets running north and south.

The names of intersecting streets are given in the order in which they intersect.
